

Deanna does not diagnose, heal or treat you. She can help you understand your bodies language better.

I realize Deanna Courtney, owner of Up Your Vibe, is only helping me to understand how the body heals according to the science of German New Medicine. At any point if something does not feel right for me, I know it is my right and responsibility to follow my inner guidance. I know it is safe and wise to express any and all healing symptoms with Deanna and my Dr. and/or discontinue and remedies or healing strategies at any point.

- Your body is always trying to heal you and make you stronger _____
- There are some stages of healing when medical intervention is necessary & advised (bleeding is one!)_____

This is my health and my responsibility-I take it back!!!
